Education

Birla Institute of Technology, Mesra

Bachelor of Technology in Electrical and Electronics Engineering

CGPA : 7.15

Nov 2022 – May 2026

Ranchi, Jharkhand

Munam Public School

Central Board Of Secondary Education(XII)

Percentage : 95%

2019 – 2021

Hazaribagh, Jharkhand

Skills

Languages: C++, C, Python, SQL

Technical Skills: Frontend, Backend, Databases, Generative AI, Devops(Basics)

Tools & Technologies: React.js, Next.js, Node.js, Docker, Prometheus, Terraform, LangChain, MySQL

Soft Skills: Leadership, Problem Solving, Time Management, Teamwork, Communication, Public Speaking

CS Fundamentals: Database Management System, Object-Oriented Programming, Data Structures and Algorithms, Operating system, Computer Networks

Experience

Productimate AI Solutions

May 2025 – July 2025

Software Developer Intern

Remote

- Built a scalable B2B SaaS Sales Agent platform used for enterprise workflows, reducing manual sales processing time by **40% through automated dashboard components**.
- Implemented **role-based authentication** and secure login/signup flows with persistent session management, improving **platform security and user access control**.
- Integrated **RESTful backend APIs** with the frontend, ensuring secure data exchange and optimized response handling across core application features.

Projects

Smart School ERP System | *ReactJS, Prisma, SupaBase, ClerkAuth* (GITHUB)

DEC 2024

- Architected a **full-stack multi-role ERP platform** supporting students, parents, faculty, and administrators, implementing RBAC to ensure secure and isolated data access across user roles.
- Designed and optimized relational database schema using **Prisma ORM**, improving query efficiency and enabling scalable handling of academic workflows and file management.
- Containerized the application using **Docker** for reproducible builds and **cloud deployment readiness**, simulating production-grade DevOps practices.

AI - Post Generator | *Langchain, RAG, VectorDB, Streamlit* (GITHUB)

JULY 2025

- Developed an AI-powered content generation tool that creates **context-aware LinkedIn posts** by analyzing influencers' historical content using **LLMs**.
- Implemented a **Retrieval-Augmented Generation (RAG) pipeline** to extract relevant context and preserve the influencer's unique writing style.
- Built a streamlined **Streamlit based UI** enabling users to select **topics, language, and content length**.

Achievements

- Secured **Rank 1** in the **Summer Mentorship Program** organized by EESOC BIT Mesra.
- Secured **3rd position** among 30+ teams in the **"CodeZilla"** coding competition, held as part of Pantheon 2024.
- Core team** member for **Bitotsav**, leading event planning and execution for one of **BIT's biggest cultural fests**.

Positions of Responsibility

Project and Tech Coordinator - Electrical and Electronics Engineering Society

Jan 2023 – Present

- Mentored and organized a hands on **C++ workshop for 200+ students**, strengthening problem solving.

Tech And Management Lead - Team Aveon Racing

Jan 2024 – Present

- Managed a team in developing the complete electrical powertrain for an electric all terrain vehicle competing in **EBAJA SAEINDIA 2025**.
